

## Tongariro National Park Helicopter use notification

This document sets out the notification process for use of a helicopter to carry out essential works in the three Ski Areas within Tongariro National Park. The organisation requiring helicopter use is responsible for notification, NOT the helicopter operator.

This will inform the Department how frequently and for what purpose helicopters are being used in the Park.

### *Things to know*

- The notification form will take about two minutes to complete and must be completed each day a helicopter is used.

---

- You will receive an automatic notification acknowledgement receipt and will only be contacted if the Department has a query with your notification.

---

- The notification form should be submitted the day before the planned heli flight, or the morning of the flight at the latest.

---

- For external maintenance follow the basic maintenance notification procedure or apply for a works approval before undertaking work

---

- Arrange your heli requirements directly with Heliservices for all general lifting requirements or other helicopter operators rated for heavy lifts > 1000 kg

---

- Any general enquiries or feedback regarding this process, please email [tongariroskiclubs@doc.govt.nz](mailto:tongariroskiclubs@doc.govt.nz).
