

**MIT 2010/01 Development of Mitigation Strategies
Trialling the 'Kellian Device':
Setting Bottom Longlines Underwater**

Dave Goad

Objectives

Carry out at sea testing of the device to describe its

- **Construction and function**
- **Positives and limitations**
- **Potential to deploy gear at depth without affecting vessel operations**
- **Suitability for the inshore fleet**

Identify potential solutions to problems encountered

Estimate costing for development

Concept

Objectives

Carry out at sea testing of the device to describe its

- **Construction and function**
- **Positives and limitations**
- **Potential to deploy gear at depth without affecting vessel operations**
- **Suitability for the inshore fleet**

Identify potential solutions to problems encountered

Estimate costing for development
