

Plate 9 Vegetation and stream morphology in native forest (NW1), pasture (PW2) and pine forest (EM1) streams.

Plate 10 Experimental channels adjacent to the Mangaotama Stream at AgResearch's Whatawhata Hillcountry Research Centre.

Plate 11 Photograph of the experimental channels showing that for low shade (notably 0% shade) algal biomass varied spatially and was occasionally high (Chl. *a* > 40 mg m⁻²).
